# No Code Digital Process Automation
# Fast Facts Infographic

Process automation is a strategic priority for organizations across the globe for 2022 and beyond. Though implementing a process automation tool can be used to gain a competitive advantage, this year, organizations do not have the luxury of choice - it is now a case of do, or die. This Fast Facts infographic highlights why organizations are accelerating process automation, the rise of no code and the democratization of citizen development.

Drivers For Process Automation

Y-axis: The primary focus of process optimization efforts for key decision makers (%)

Legend: 2019, 2021, 2023

Categories: Accelerate digital transformation, Improve worker productivity, Improve customer experiences

Figures sourced from the The Forrester Digital Process Automation (DPA) Technology Survey Results 2021
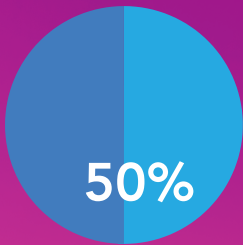

The Rise Of No Code

70%

By 2025, 70% of new applications developed by enterprises will use no code or low code technologies (less than 25% in 2020)

Through 2022, the needs of business driven hyperautomation will be one of the top 3 drivers for low code adoption.

50%

Over 50% of medium-to-large enterprises will adopt no code/low code platforms as part of their overall IT strategy by 2023.

Figures sourced from Gartner Forecast Analysis: Low Code Development Technologies 2021

The Democratization Of Citizen Development

The future of development is becoming more democratic and faster, according to the Forrester Report, The Democratization Of Development Is Accelerating. Some key facts from this report include:
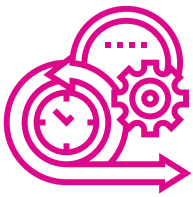

26% of senior developers say their firm empowers business personnel from outside of IT to do development work through a "citizen developer" strategy.

In **5 years**, "development" work will be fully spread across a spectrum: from central IT teams to individual knowledge.

In **10 years**, we will see development work on common platforms being so ordinary that it won't be called "development" anymore - it will just be work.
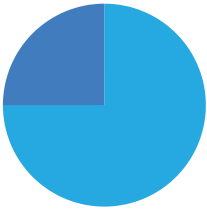

Achieve Serious Savings

Process automation can be difficult, but with the FlowForma Process Automation Tool, it has never been easier to achieve serious savings.

More than **6,000 hours** saved per year

Over **50%** reduction in customer complaints

See > **75%** reduction in emails

Over **100,000** sheets of paper saved

Savings realized by FlowForma customers

PROCESS AUTOMATION TIMELINE

Install the FlowForma app for Office 365	Accelerated lift off with FlowForma Specialist help	Your 1st process goes live in 2 weeks	Train business users up for best practice digitization	Your 2nd & 3rd processes go live	You have 50+ processes digitized
Week 1	Week 1	Week 2	Week 2	Week 5	Month 12
