

YOUR GUIDE FOR HEALTHCARE PROCESS DIGITALIZATION

As the leading provider of process automation tools for the healthcare sector, FlowForma has compiled this infographic based on industry research and customer insights. This guide will support you on your digital transformation journey and paper-lite initiatives. Understand how the no code FlowForma Process Automation tool accelerates process digitalization, to replace paper, improve back-end and patient-facing processes, improve reporting and ultimately deliver better patient experiences.

HELPING YOU OVERCOME COMMON PROCESS CHALLENGES

64% of healthcare decision makers tell us that **50%** to **100%** of their hospital processes are managed on paper/email/excel

The Impact of Paper Processes on Hospitals

Missing Data	84%
Poor Visibility	80%
Inefficiencies	75%
Difficulty Proving Compliance	72%
Poor Care Collaboration	65%

What Prevents Hospitals From Digitalizing

No Resources/Technical Skills	38%
Fear of Change	34%
No Budget	31%
No Owner for Initiative	26%
Not a Priority	21%

62% of healthcare workers tell us their hospitals want to digitalize processes for faster sign off and decision making. *FlowForma users prevent approval delays with sign off notifications and reminders, as well as seamless auditability.*

38% believe that a lack of resources and technical skillsets has prevented them from moving processes online. *FlowForma customers are digitalizing at scale by empowering their businesspeople to digitalize with a no code tool.*

69% of healthcare decision makers surveyed say their hospital is motivated to digitalize, to improve patient care. *FlowForma Process Automation eliminates paper process administration and empowers clinicians to serve the healthcare needs of citizens.*

TIPS FOR PROCESS AUTOMATION SUCCESS

Deploy a no code automation tool

NO CODE
logic only.

- Address the demand for automating healthcare processes by enabling process owners to digitalize
- Start by digitalizing a simple process that will have a great impact
- Say goodbye to manual/invisible paper, email and spreadsheet processes
- Empower your hospital with real-time rich data for better decision making and process improvement

TRUSTED BY

"You have better outcomes when clinicians have access to digital data and are not running around looking for paper to treat patients. That's our driver for digitalizing processes with FlowForma Process Automation."

- Mark Graham, Director of ICT, Beaumont Hospital
