Why Choose FlowForma Process Automation Over Microsoft PowerApps?

"When looking to automate we whittled our shortlist down to Microsoft PowerApps versus FlowForma Process Automation. It quickly became evident that FlowForma Process Automation had a much more robust and customizable set of features to empower our workforce, than any other tool we had reviewed. Our PowerApps equivalent of this process required building 3 different apps (mobile, tablet and desktop) using code by busy IT developers, which was very time consuming. The end-product of which ultimately failed to integrate with other existing systems.

We chose FlowForma Process Automation mainly because of its speed - **we only need to build once**; no coding skills are required, and it integrates seamlessly with other systems. I love that anyone can be trained up, to create powerful process solutions with the FlowForma tool.

The solution we built in 4 weeks with PowerApps, we created in 1 week with FlowForma Process Automation!"

Karl Henderson,
Digital Engineering Lead, Downer Group

"We looked at Nintex and K2, from our point, they were cost prohibitive. We didn't feel that we would be going down the no code route and still would need a lot of influence and support from IT, so we didn't want to pursue that.

We looked at PowerApps, which again didn't really fit the bill. Some features seemed quite good, but once we dived into it a bit more, it became quite evident we were going to need to have skills around accessing APIs and doing a bit of Java.

FlowForma Process Automation met all our requirements."

James Morgan,
IT Manager, Costain, Skanska & Balfour Beatty
- A14 Joint Venture

Experience Rapid ROI

Save > \$80,000 per significant process	Digitize 50+ processes a year	Deploy processes 60% faster	Save over 6,000 admin hours per year	Deliver a 16% carbon footprint reduction
