

Digitally Transforming Pharmaceutical Processes To Boost Efficiencies And Improve Compliance

An award-winning Microsoft 365[®] app, FlowForma[®] Process Automation empowers pharmaceutical organizations to rapidly automate processes and drive digital transformation. The FlowForma Process Automation[®] tool is proven to streamline business processes — resulting in increased visibility, compliance, and efficiency, while delivering a high standard of work.

Sitting on the SharePoint[®] platform, the FlowForma Process Automation tool incorporates forms, workflow, document generation, analytics, and much more in the all-in-one tool. A proven no code, logic only approach enables process owners to quickly automate and deploy processes online. Digitalizing pharmaceutical processes such as artwork approval and access to seamless reporting and advanced analytics, empowers workers to collaborate and work to their full potential

The tool integrates directly with your Microsoft 365 SharePoint environment to leverage all the benefits that this powerful collaboration platform provides.

Process Challenges In The Pharmaceutical Industry

In an industry with regulation at its core, a key challenge for pharmaceutical organizations is staying ahead of compliance with evolving and complex legislation. Artwork is at the epicentre of legislation as marketing and compliance departments collaborate on the design and messaging that adheres to industry standards. The artwork approval process can be long and complex, leading to delays in product deployments.

Cross-departmental collaboration is vital to streamline artwork approval processes. However, with multiple stakeholders involved in the process, manual communications can delay approvals. Emails can get lost in inboxes, resulting in unorganized and unstructured work, leading to project delays and reduced efficiency.

How Can FlowForma Process Automation Help Pharmaceutical Organizations

FlowForma Process Automation is an award-winning tool equipped with capabilities that are specifically designed for the digitalization of a wide range of pharmaceutical processes. FlowForma Process Automation's no code functionality works seamlessly across multiple devices to rapidly automate processes and improve compliance and communication, enhance productivity, reduce costs, and increase profits.

Sample Use Cases

- Artwork approval
- Compliance
- Performance appraisal
- Pharmacovigilance
- Supply chain management
- CAPEX/OPEX

Why Pharmaceutical Organizations Choose FlowForma Process Automation

- ✓ 100% No Code cloud based tool
- ✓ No hardware/infrastructure required
- ✓ Minimal IT reliance
- ✓ ROI in under 6-weeks
- ✓ 5x faster than any other tool

About FlowForma

FlowForma is the leading provider of enterprise-class, no code digital process automation tools that empower process owners to rapidly digitalize a wide range of processes.

FlowForma Process Automation empowers process owners in pharma, healthcare, construction, engineering, financial services, and more, to digitalize complex business processes in-house, without writing any software code.

Customers are live with digital processes, empowered and self-sufficient within weeks of onboarding. Users rapidly reap ROI, resilience, and innovation. FlowForma Process Automation is making waves in the automation space with its process templates, external stakeholder engagement, and offline capability.

FlowForma is a Microsoft Gold Partner, with over 200,000 global users. The company is headquartered in Ireland with offices in London and New York and is motivated by its values to innovate, evolve, and achieve with employees, customers, and partners.

60% efficiency improvement in artwork approval

FlowForma Process Automation enabled a global pharmaceutical body to streamline their artwork process, delivering numerous benefits back to the business.

Solution:

By taking emails out of the process, eliminating phone calls and automating workflow, the process of artwork management has seen a 50-60% efficiency improvement with FlowForma Process Automation.

It's not unusual for over 100 workflows to be running concurrently, each typically involving around ten people and handling hundreds of change requests. Artwork is cleared and released much faster and for the first time the company has the visibility it needs to prioritize projects. Streamlining the artwork process through FlowForma Process Automation has delivered numerous benefits.

“We did some benchmarking of a range of no code products. The look and feel of FlowForma Process Automation took it through to the final selection where we asked for a proof-of-concept and it excelled. The no code setup means the process owners are heavily involved; they can understand what is happening without requiring any knowledge of systems or coding language. It motivates people to learn how to maintain their own processes and extend them beyond their own sites.”

Dennis Mingerot,
Global Procurement Research Manager,
